

Nama : Jhoshe maechel

Npm : 22312077

Kelas : IF 22 C

Dokumentasi project

```
model tb_admin{
  id Int @id @default(autoincrement())
  username String @db.VarChar(50)
  password String @db.VarChar(50)
  status status
}

enum status{
  Y
  N
}
```

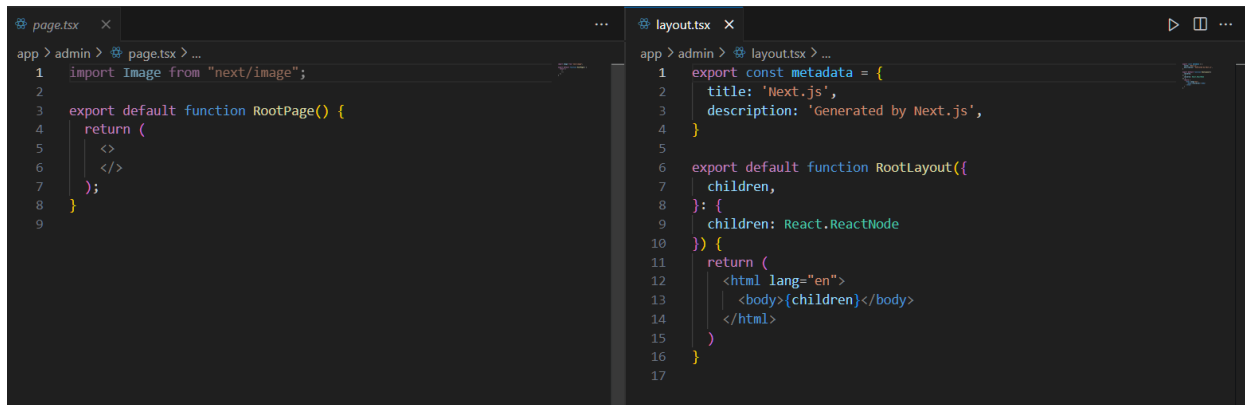

<input type="checkbox"/>	id #	username A	password A	status ≡
<input type="checkbox"/>	1	jhoshe	123	Y

Deskripsi : Membuat schema.prisma untuk tabel admin yg berisi id, username, password, dan status

```
TS barang.ts U x
app > models > TS barang.ts > ...
1 "use server";
2
3 import { PrismaClient } from "@prisma/client";
4
5 //buat variabel "prisma"
6 const prisma = new PrismaClient ();

TS admin.ts U x
app > models > TS admin.ts > ...
1 "use server";
2
3
4 import { PrismaClient } from "@prisma/client";
5
6 //buat variabel "prisma"
7 const prisma = new PrismaClient ();
```

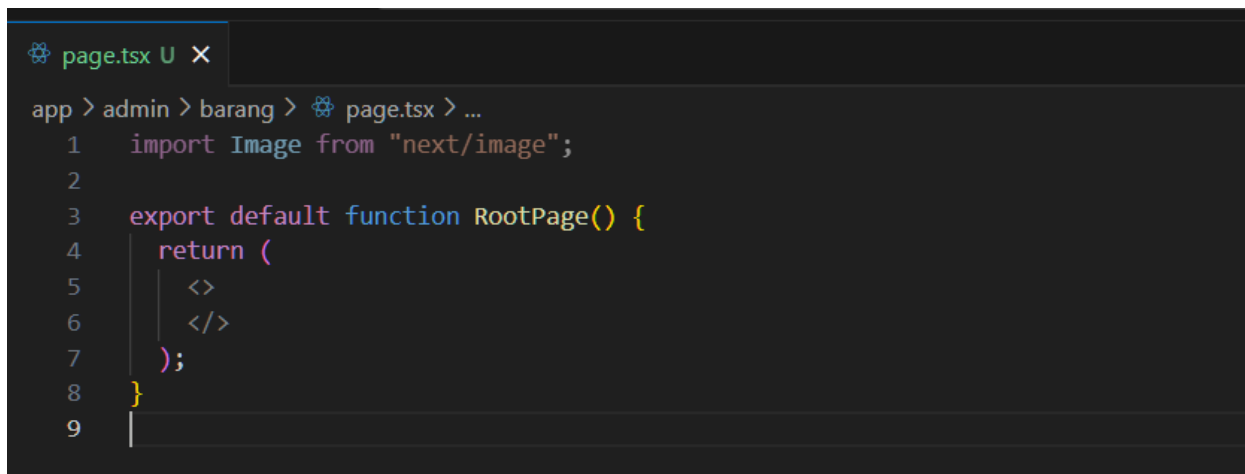

Deskripsi : Membuat folder models yang berisi file barang.ts dan admin.ts

```
app > admin > page.tsx > ...
1 import Image from "next/image";
2
3 export default function RootPage() {
4   return (
5     <>
6   </>
7   );
8 }
9

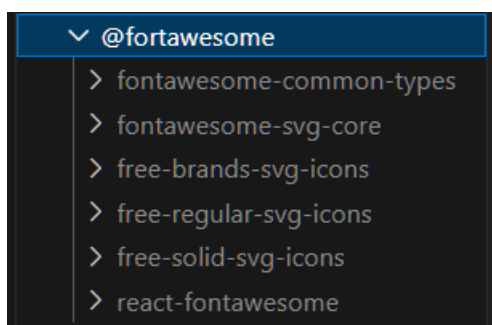

app > admin > layout.tsx > ...
1 export const metadata = {
2   title: 'Next.js',
3   description: 'Generated by Next.js',
4 }
5
6 export default function RootLayout({
7   children,
8 }: {
9   children: React.ReactNode
10 }) {
11   return (
12     <html lang="en">
13       <body>{children}</body>
14     </html>
15   )
16 }
17
```

Deskripsi : membut folder admin dan di dalam folder admin berisi page.tsx dan layout.tsx

```
app > admin > barang > page.tsx > ...
1 import Image from "next/image";
2
3 export default function RootPage() {
4   return (
5     <>
6   </>
7   );
8 }
9
```

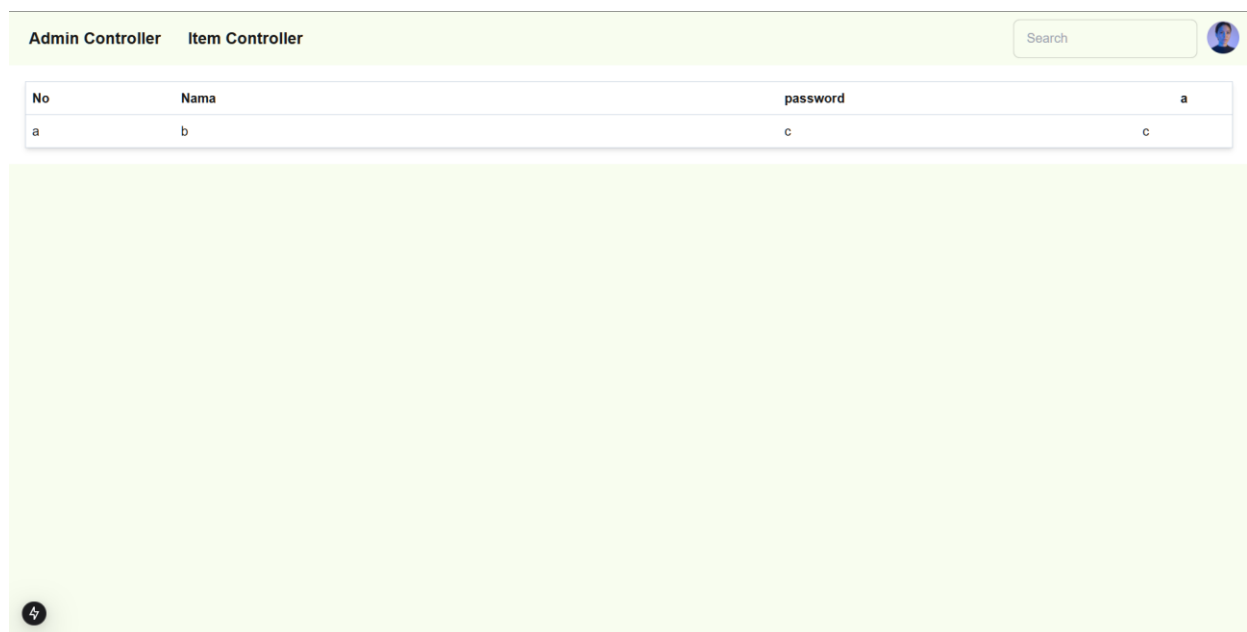

Deskripsi : membuat folder barang di dalam folder admin dan berisi file page.tsx

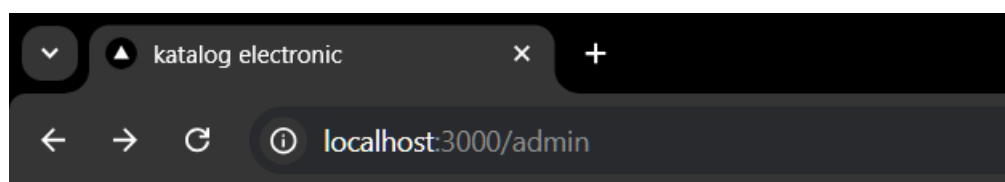

Deskripsi : Melakukan instalasi font awesome

Membuat navbar pada bagian admin dibagian atas dan mengaplikasikan tema dasyui

Menambahkan tabel admin controller dan judulnya

Merubah title dan deskripsi menjadi Katalog elektronik pada file layout.tsx di folder admin

```

app > admin > layout.tsx > AdminLayout
13 export default function AdminLayout({
14   t: t, header: header
15 }) {
16   <header>
17     <div className="navbar bg-base-100">
18       <div className="flex-1">
19         <Link href="/admin" className="btn btn-ghost text-xl">Admin Controller</Link>
20         <Link href="/barang" className="btn btn-ghost text-xl">Item Controller</Link>
21       </div>
22       <div className="flex-none gap-2">
23         <div className="form-control">
24           <input type="text" placeholder="Search" className="input input-bordered w-24 md:w-auto" />
25         </div>
26         <div className="dropdown dropdown-end">
27           <div tabIndex={0} role="button" className="btn btn-ghost btn-circle avatar">
28             <div className="w-10 rounded-full">
29               
32             </div>
33           </div>
34           <ul
35             tabIndex={0}
36             className="menu menu-sm dropdown-content bg-base-100 rounded-box z-[1] mt-3 w-52 p-2 shadow">
37             <li>
38               <a className="justify-between">
39                 Profile
40                 <span className="badge">New</span>
41               </a>
42             </li>
43             <li><a>Settings</a></li>
44             <li><a>Logout</a></li>
45           </ul>
46         </div>
47       </div>
48     </div>
49   </header>
50 }

```

Memperbaiki kesalahan program pada admin>layout.tsx yang mana program sebelumnya di bungkus dengan <html></html> yang mana hal tersebut untuk rootLayout
